Technical Skills

Programming Languages: HTML, CSS, JavaScript, NodeJS (Express.js) Java, Python

Frameworks/Technologies: React, Next.js, Tailwind CSS, SASS, SEO, Bootstrap, Redux, Context API

Version Control/Tools: Git, GitHub, BitBucket, Figma

Databases: MySQL, MongoDB

Professional Experience

Frontend Developer Intern – Gray Matrix

Feb 2025 – May 2025 (3 Months)

- Collaborated with cross-functional teams to optimize frontend performance, reducing load time by 30%.
 - Developed reusable UI components using React.js, SASS, and JavaScript, accelerating future development by 25%.
 - Improved accessibility and cross-device compatibility, achieving **100% responsiveness** across mobile, tablet, and desktop devices.
- Designed and developed clean UIs for enterprise products (PNB AI BotSite, TalkktoDocs), increasing **user engagement by 15%**.

Projects/Personal Experience

Student Feedback Analysis

April-2025

- Web-based platform that automates the analysis of student feedback using AI.
- By integrating **Natural Language Processing (NLP)** and **Machine Learning (ML)**, the system processes both quantitative and qualitative feedback to provide actionable insights to instructors.
- This enhances teaching quality, streamlines feedback evaluation, and aligns with UGC/AICTE guidelines.
- **Skills used:** React.js, Python, Flask, DistilBERT, OLLAMA, Firebase

Bookstack Web

July-2024

- Developed a website for purchasing books that includes features such as user authentication, access to specific pages upon login, responsiveness, and a toggle between dark and light modes, utilizing React and Vite.
- Integrated **MongoDB** to manage user credentials and book inventory, enabling dynamic and scalable data storage and backend **APIs** using **Node.js** and **Express**, ensuring secure and efficient data handling.
- **Skills used:** React, Tailwind CSS, Node.js, RESTful APIs, MongoDB

Online Quiz Web Application

Aug -2023

- Developed a real-time **interactive quiz platform** using **PHP**, enabling users to take real-time quizzes with dynamic scoring and feedback.
- Collaborated in a team of developers to build and style the frontend using **HTML, CSS, and JavaScript**, and managed backend operations with **PHP** and **MySQL** for storing user progress and quiz data.
